KHONDKER SALMAN SAYEED

salkhon050@gmail.com | salkhon.github.io
Khondker Salman Sayeed | salkhon | salkhon | SalmanKhondker

Research Interest

- Natural Language Processing
- Multimodal Learning
- Vision Language Modeling
- Low Resource Deep Learning

My research goal is to advance research and development in Natural Language Processing and Multimodal Learning, with a focus on Vision-Language Models. Seeking opportunities to apply AI for real-world impact, leveraging strong technical skills and a proven track record of success in deep learning competitions.

Education

- **Bangladesh University of Engineering and Technology (BUET)** *April 2019 - June 2024*
  Bachelor of Science in Computer Science and Engineering Dhaka, Bangladesh
  CGPA: 3.9/4.0, placed on the dean's list in all terms. (academic session delay due to COVID-19 pandemic)

Publications

Accepted
Haz Sameen Shahgir†, **Khondker Salman Sayeed**†, Abhik Bhattacharjee, Wasi Uddin Ahmad, Yue Dong, Rifat Shahriyar (Joint first-author)
Title: "IllusionVQA: A Challenging Optical Illusion Dataset for Vision Language Models".
[🔗] [arXiv]
COLM 2024: *The 1st Conference on Language Modeling*

Under Review
Tamzeed Mahfuz, Satak Kumar Dey, Ruwad Naswan, Hasnaen Adil, **Khondker Salman Sayeed**, Haz Sameen Shahgir
Title: "Too Late to Train, Too Early To Use? A Study on Necessity and Viability of Low-Resource Bengali LLMs".
[arXiv]
COLING 2025*: The 31st International Conference on Computational Linguistics*

Under Review
Haz Sameen Shahgir, Rownok Zahan Ratul, Md Toki Tahmid, **Khondker Salman Sayeed**, Atif Hasan Rahman
Title: "RNA-DCGen: Dual Constrained RNA Sequence Generation with LLM-Attack".
[bioRxiv]
NeurIPS 2024 MLSB*: Workshop on Machine Learning in Structural Biology*

Competition
H.A.Z. Sameen Shahgir†, **Khondker Salman Sayeed**†, Tanjeem Azwad Zaman†, Md. Asif Haider†, Sheikh Saifur Rahman Jony, M. Sohel Rahman (Joint first-author)
Title: "Ophthalmic Biomarker Detection Using Ensembled Vision Transformers – Winning Solution to IEEE SPS VIP Cup 2023".
[🔗] [arXiv]
ICIP 2023*: IEEE SPS Video and Image Processing Cup*

Work Experience

- **IQVIA [🔗]** *June 2024 - Present*
  Machine Learning Engineer Dhaka, Bangladesh
  - Joined the Next Best Action ML team at the IQVIA Orchestrated Analytics project.
  - Working on training, testing, and deploying IQVIA's in-house Large Language Models for generating expert domain-specific insights on the pharmaceutical industry.
- **BUET CSE NLP Lab [🔗]** *March 2023 - June 2024*
  Research Assistant Dhaka, Bangladesh
  - Prepared a benchmark illusion dataset that tests the visual understanding capabilities of Vision Language Models to identify visual illusions in images and correctly describe them. Published this first-author work at COLM 2024.
  - Worked on extending the XLSum dataset from BUET CSE NLP group to include images and BBC article-summary pairs.
  - Used multimodal models using images and articles to generate summaries from the extended dataset to research potential improvements in the quality of generated summaries as a result of the inclusion of images

  Supervisors: Prof. Rifat Shahriyar, CSE BUET. Wasi Uddin Ahmad, Senior Research Scientist, NVIDIA. Prof. Tahmid Hasan, CSE, BUET.

Honors and Awards

- **IEEE Upsilon Pi Epsilon Honor Society Award 2023 (Awardee)** *February 2024*
  IEEE Computer Society [🔗]
  - Received this prestigious award in recognition of my academic results and success in national and international deep learning competitions.
  - Awarded to only 4 applicants internationally.
  - Received a $1000 scholarship.
- **IEEE Video and Image Processing Cup 2023 (Champion)** *October 2023*
  IEEE Signal Processing Society, ICIP 2023 [🔗] [arXiv]
  - Champion in this annual international computer vision competition. 2023's edition was based on biomarker prediction from retina OCT scans.
  - Received travel grant to present our solution at ICIP 2023, Kuala Lumpur, and a $5000 scholarship prize.
  - **Summary:** In this work, we employed two vision transformer-based models: MaxViT and EVA-02. Our ensembled solution achieved a patient-wise F1 score of 0.81 in the first phase and 0.85 in the second and final phase, setting the state-of-the-art ophthalmic biomarker detection using OCT images.
- **DLSprint 2022 (Champion)** *September 2022*
  Optimizely, Bengali.AI, and CSE BUET [🔗] [arXiv] [GitHub]
  - Champion in this Kaggle community competition based on Automatic Speech Recognition on the Bengali Common Voices Dataset.
  - Received a $1300 scholarship.
  - **Summary:** In this work, we fine-tuned wav2vec 2.0 for Bengali speech recognition using the Bengali Common Voice Speech Dataset. Our model achieved impressive results, with a word error rate (WER) of 0.25 on the validation set and a Levenshtein Distance of 2.61 after further training. This work bridges the gap for a widely spoken language.
- **EEE Day Datathon 2023 (First Runner-up)** *March 2023*
  EEE BUET, Apurba Technologies Ltd. [🔗] [arXiv] [GitHub]
  - Runner-up in this Kaggle community competition based on Automatic Grammatical Error Tagging on Bengali Text.
  - Received a $500 scholarship.
  - **Summary:** In this work, we propose a method for detecting grammatical errors in Bangla using a Text-to-Text Transfer Transformer (T5) Language Model. We fine-tune the small variant of BanglaT5 on a corpus where errors are bracketed by the dedicated symbol $. Despite the T5 model's primary design for translation, we achieve low Levenshtein Distance in tagging grammatical errors in Bangla.
- **AI For Bangla 2023 (Honorable Mention)** *March 2023*
  EBLICT, Bangladesh Computer Council (BCC) [🔗] [arXiv] [GitHub]
  - Prize winner in this national competition calling for advancements in AI for Bengali for creating the first Bengali Sign Language video dataset and preparing a baseline on that dataset.
  - Received a $500 scholarship.
  - **Summary:** In this research, we introduce a new word-level Bangla Sign Language dataset, BdSL40, comprising 611 videos across 40 words. We prepare two baselines for classification: one using a 3D Convolutional Neural Network (CNN) model and another employing a novel Graph Neural Network (GNN) approach.
- **Robi Datathon 2024 (First Runner-up)** *May 2024*
  Robi Axiata Ltd, Huawei [🔗]
  - Runner-up in this national data-science competition based on customer purchase behavior prediction in a data-scarce setting.
  - Received a $3000 scholarship.

Leadership Experience

- **Lead Organizer & Instructor of DLSprint 2.0 2023** *August 2023*
  BJIT Group, CSE BUET [🔗]
  - Served as an organizer of this open-for-all Computer Vision Competition on Automatic Document Layout Analysis for Bengali.
  - Conducted two workshops as an instructor on common competition practices, computer vision, and image segmentation.
  - Took ownership, being involved in the competition's conception to execution.

Projects

- **Ticketing** – A microservices web app that lets users buy and sell tickets
  - Backend: NodeJS, Typescript, MongoDB, NATS Streaming. Consists of 6 independent services, coordinated by an eventbased architecture.
  - Frontend: NextJS, TailwindCSS
  - Orchestration: Kubernetes
- **Sub-C-Compiler** – A compiler for a subset of the C programming language
  - Tools: Flex (Lexer), GNU Bison (Paser)
  - Languages: C, C++
- **Mobile-Doc** – A telemedicine web app
  - Backend: FastAPI, MongoDB, Redis, BigQuery
  - Frontend: React, MUI
  - Deployment: Netlify
  - Deployment: Pokedoc
- **Suntech** – An e-commerce web app
  - Backend: Flask, OracleDB
  - Frontend: Jinja2, HTML, CSS, VanillaJS
- **Ray-Tracing** – A rendering pipeline implementing ray tracing in OpenGL scenes
  - Language: C++
  - Algorithms: Phong Lighting Model, Recursive Reflection
- **Enhanced xv6 OS** – Copy-On-Write and Memory Page-Replacement in the xv6 OS
  - Language: C
  - System Calls, Process Schedulers, Page Replacement
- **twitt3r** – A Twitter clone using the t3 stack
  - Framework: NextJS
  - Stack: T3 (Typescript, trpc, TailwindCSS)
  - Persistence: PlanetScale, Prisma ORM
  - Deployment: Vercel
  - Deployment: twitt3r
- **DocumentQA** – A langchain LLM document chatbot
  - Language: Python
  - Libraries: langchain, OpenAI
  - UI: Chainlit
  - Database: ChromaDB Vector Database
- **IllusionVQA** – A Challenging Optical Illusion Dataset for Vision Language Models
  - This work is a part of my undergraduate thesis
  - Published at **COLM'24**
  - Paper: IllusionVQA: A Challenging Optical Illusion Dataset for Vision Language Models
  - Website: IllusionVQA
