EXPERIENCE

CSE BUET NLP Lab — Undergraduate Research Assistant

APRIL 2023 - PRESENT

Researching **multimodal** deep learning and **Vision Language Models** (VLM) for an undergraduate thesis. Curated a large **dataset** of newspaper articles, images, and summaries to improve the **abstractive summarization** task by including image data along with the article. Prepared a benchmark illusion dataset that tests the **visual understanding** capabilities of VLMs.

Northwest Power Generation Company — Machine Learning Intern

APRIL 2023 - MAY 2023

Worked with the powerplant maintenance team to develop a **Multi-Layer Perceptron** and an **LSTM** model to analyze the powerplant performance level and failure prediction. Analyzed powerplant sensor data to employ data-cleaning and **feature engineering** techniques that allowed the machine learning model to predict with better accuracy.

DLSprint 2.0 2023 — Organizer and Instructor

JUNE 2023 - AUGUST 2023

Served as an organizer of this open-for-all **Deep Learning Competition** about **Document Layout Analysis**. Conducted two **workshops** as an **instructor** on common competition practices, computer vision, and image segmentation. Took ownership, being involved in the competition's conception to execution.
