

# KHONDKER SALMAN SAYEED

salkhon050@gmail.com | salkhon.github.io

 salkhon |  salkhon |  SalmanKhondker

## RESEARCH INTEREST

- Natural Language Processing
- Vision Language Modeling
- Multimodal Learning
- Low Resource Deep Learning

My research goal is to advance research and development in Natural Language Processing and Multimodal Learning, with a focus on Vision-Language Models. Seeking opportunities to apply AI for real-world impact, leveraging strong technical skills and a proven track record of success in deep learning competitions.

## EDUCATION

- **Bangladesh University of Engineering and Technology** April 2019 - June 2024  
*Bachelor of Science in Computer Science and Engineering*  
CGPA: 3.9/4.0, placed on the dean's list in all terms. Dhaka, Bangladesh

## WORK EXPERIENCE

- **IQVIA**  June 2024 - Present  
*Machine Learning Engineer* Dhaka, Bangladesh
    - Joined the Next Best Action ML team at the IQVIA Orchestrated Analytics project.
    - Working on developing and deploying IQVIA's in-house Large Language Models for generating expert domain-specific insights.
  - **BUET CSE NLP Lab**  March 2023 - June 2024  
*Research Assistant* Dhaka, Bangladesh
    - Prepared a benchmark illusion dataset that tests the visual understanding capabilities of Vision Language Models to identify visual illusions in images and correctly describe them. Published this first-author work at COLM 2024.
    - Worked on extending the XLSum dataset from BUET CSE NLP group to include images and BBC article-summary pairs.
    - Used multimodal models using images and articles to generate summaries from the extended dataset to research potential improvements in the quality of generated summaries as a result of the inclusion of images
-  Supervisors: Prof. Rifat Shahriyar, CSE BUET. Wasi Uddin Ahmad, Senior Research Scientist, NVIDIA. Prof. Tahmid Hasan, CSE, BUET.

## HONORS AND AWARDS

---

- **IEEE Upsilon Pi Epsilon Honor Society Award 2023 (Awardee)**

February 2024

IEEE Computer Society

- Received this prestigious award in recognition of my academic results and success in national and international deep learning competitions.
- Awarded to only 4 applicants internationally.
- Received a \$1000 scholarship.

- **IEEE Video and Image Processing Cup 2023 (Champion)**

October 2023

IEEE Signal Processing Society, ICIP 2023

- Champion in this annual international computer vision competition. 2023's edition was based on biomarker prediction from retina OCT scans.
- Received travel grant to present our solution at ICIP 2023, Kuala Lumpur, and a \$5000 scholarship prize.
- **Summary:** In this work, we employed two vision transformer-based models: MaxViT and EVA-02. Our ensembled solution achieved a patient-wise F1 score of 0.81 in the first phase and 0.85 in the second and final phase, setting the state-of-the-art ophthalmic biomarker detection using OCT images.

- **DL Sprint 2022 (Champion)**

September 2022

Optimizely, Bengali.AI, and CSE BUET

- Champion in this Kaggle community competition based on Automatic Speech Recognition on the Bengali Common Voices Dataset.
- Received a \$1300 scholarship.
- **Summary:** In this work, we fine-tuned wav2vec 2.0 for Bengali speech recognition using the Bengali Common Voice Speech Dataset. Our model achieved impressive results, with a word error rate (WER) of 0.25 on the validation set and a Levenshtein Distance of 2.61 after further training. This work bridges the gap for a widely spoken language.

- **EEE Day Datathon 2023 (First Runner-up)**

March 2023

EEE BUET, Apurba Technologies Ltd.

- Runner-up in this Kaggle community competition based on Automatic Grammatical Error Tagging on Bengali Text.
- Received a \$500 scholarship.
- **Summary:** In this work, we propose a method for detecting grammatical errors in Bangla using a Text-to-Text Transfer Transformer (T5) Language Model. We fine-tune the small variant of BanglaT5 on a corpus where errors are bracketed by the dedicated symbol \$. Despite the T5 model's primary design for translation, we achieve low Levenshtein Distance in tagging grammatical errors in Bangla.

- **AI For Bangla 2023 (Honorable Mention)**

March 2023

EBLICT, Bangladesh Computer Council (BCC)

- Prize winner in this national competition calling for advancements in AI for Bengali for creating the first Bengali Sign Language video dataset and preparing a baseline on that dataset.
- Received a \$500 scholarship.
- **Summary:** In this research, we introduce a new word-level Bangla Sign Language dataset, BdSL40, comprising 611 videos across 40 words. We prepare two baselines for classification: one using a 3D Convolutional Neural Network (CNN) model and another employing a novel Graph Neural Network (GNN) approach.

- **Robi Datathon 2024 (First Runner-up)**

May 2024

Robi Axiata Ltd, Huawei

- Runner-up in this national data-science competition based on customer purchase behavior prediction in a data-scarce setting.
- Received a \$3000 scholarship.

## LEADERSHIP EXPERIENCE

---

- **Lead Organizer & Instructor of DL Sprint 2.0 2023**

August 2023

BJIT Group, CSE BUET

- Served as an organizer of this open-for-all Computer Vision Competition on Automatic Document Layout Analysis for Bengali.
- Conducted two workshops as an instructor on topics of common competition practices, computer vision, and image segmentation.
- Took ownership, being involved in the competition's conception to execution.
