🎓 Khondker Salman Sayeed | 🔗 salkhon | ⭘ salkhon | 🐦 SalmanKhondker

RESEARCH INTEREST

- Natural Language Processing
- Multimodal Learning
- Vision Language Modeling
- Low Resource Deep Learning

My research goal is to advance research and development in Natural Language Processing and Multimodal Learning, with a focus on Vision-Language Models. Seeking opportunities to apply AI for real-world impact, leveraging strong technical skills and a proven track record of success in deep learning competitions.

EDUCATION

- **Bangladesh University of Engineering and Technology (BUET)** *April 2019 - June 2024*
  Bachelor of Science in Computer Science and Engineering Dhaka, Bangladesh
  CGPA: 3.9/4.0, placed on the dean's list in all terms. (academic session delay due to COVID-19 pandemic)

PUBLICATIONS

Published	Haz Sameen Shahgir[†], **Khondker Salman Sayeed**[†], Abhik Bhattacharjee, Wasi Uddin Ahmad, Yue Dong, Rifat Shahriyar (Joint first-author) Title: "IllusionVQA: A Challenging Optical Illusion Dataset for Vision Language Models". [🔗] [arXiv] 📖 **COLM 2024:** *The 1st Conference on Language Modeling*
Accepted	Haz Sameen Shahgir, Rownok Zahan Ratul, Md Toki Tahmid, **Khondker Salman Sayeed**, Atif Hasan Rahman Title: "RNA-DCGen: Dual Constrained RNA Sequence Generation with LLM-Attack". [bioRxiv] 📖 **NeurIPS 2024 MLSB**: *Workshop on Machine Learning in Structural Biology*
Under Review	Tamzeed Mahfuz, Satak Kumar Dey, Ruwad Naswan, Hasnaen Adil, **Khondker Salman Sayeed**, Haz Sameen Shahgir Title: "Too Late to Train, Too Early To Use? A Study on Necessity and Viability of Low-Resource Bengali LLMs". [arXiv] 📖 **COLING 2025**: *The 31st International Conference on Computational Linguistics*

WORK EXPERIENCE

- **IQVIA [🔗]** *June 2024 - Present*
  Machine Learning Engineer Remote
  - Working on the development and deployment of IQVIA's in-house Large Language Models for generating expert domain-specific insights.
  - Developing a Mixture-of-Agents based AI Assistant pipeline using LangGraph, CrewAI. Serving business users with data-informed intelligent and interactive responses.

- **BUET CSE NLP Lab [🔗]** *March 2023 - June 2024*
  Research Assistant Dhaka, Bangladesh
  - Prepared a benchmark illusion dataset that tests the visual understanding capabilities of Vision Language Models to identify visual illusions in images and correctly describe them. Published this first-author work at COLM 2024.
  - Worked on extending the XLSum dataset from BUET CSE NLP group to include images and BBC article-summary pairs.
  - Used multimodal models using images and articles to generate summaries from the extended dataset to research potential improvements in the quality of generated summaries as a result of the inclusion of images

👤 Supervisors: Prof. Rifat Shahriyar, CSE BUET. Wasi Uddin Ahmad, Senior Research Scientist, NVIDIA. Prof. Tahmid Hasan, CSE, BUET.

HONORS AND AWARDS

- **IEEE Upsilon Pi Epsilon Honor Society Award 2023 (Awardee)** *February 2024*
  IEEE Computer Society [🔗]
  - Received this prestigious award in recognition of my academic results and success in national and international deep learning competitions.
  - Awarded to only 4 applicants internationally.
  - Received a $1000 scholarship.

- **IEEE Video and Image Processing Cup 2023 (Champion)** *October 2023*
  IEEE Signal Processing Society, ICIP 2023 [🔗] [arXiv]
  - Champion in this annual international computer vision competition. 2023's edition was based on biomarker prediction from retina OCT scans.
  - Received travel grant to present our solution at ICIP 2023, Kuala Lumpur, and a $5000 scholarship prize.
  - **Summary:** In this work, we employed two vision transformer-based models: MaxViT and EVA-02. Our ensembled solution achieved a patient-wise F1 score of 0.81 in the first phase and 0.85 in the second and final phase, setting the state-of-the-art ophthalmic biomarker detection using OCT images.

- **DLSprint 2022 (Champion)** *September 2022*
  Optimizely, Bengali.AI, and CSE BUET [🔗] [arXiv] [◯]
  - Champion in this Kaggle community competition based on Automatic Speech Recognition on the Bengali Common Voices Dataset.
  - Received a $1300 scholarship.
  - **Summary:** In this work, we fine-tuned wav2vec 2.0 for Bengali speech recognition using the Bengali Common Voice Speech Dataset. Our model achieved impressive results, with a word error rate (WER) of 0.25 on the validation set and a Levenshtein Distance of 2.61 after further training. This work bridges the gap for a widely spoken language.

- **EEE Day Datathon 2023 (First Runner-up)** *March 2023*
  EEE BUET, Apurba Technologies Ltd. [🔗] [arXiv] [◯]
  - Runner-up in this Kaggle community competition based on Automatic Grammatical Error Tagging on Bengali Text.
  - Received a $500 scholarship.
  - **Summary:** In this work, we propose a method for detecting grammatical errors in Bangla using a Text-to-Text Transfer Transformer (T5) Language Model. We fine-tune the small variant of BanglaT5 on a corpus where errors are bracketed by the dedicated symbol $. Despite the T5 model's primary design for translation, we achieve low Levenshtein Distance in tagging grammatical errors in Bangla.

- **AI For Bangla 2023 (Honorable Mention)** *March 2023*
  EBLICT, Bangladesh Computer Council (BCC) [🔗] [arXiv] [◯]
  - Prize winner in this national competition calling for advancements in AI for Bengali for creating the first Bengali Sign Language video dataset and preparing a baseline on that dataset.
  - Received a $500 scholarship.
  - **Summary:** In this research, we introduce a new word-level Bangla Sign Language dataset, BdSL40, comprising 611 videos across 40 words. We prepare two baselines for classification: one using a 3D Convolutional Neural Network (CNN) model and another employing a novel Graph Neural Network (GNN) approach.

- **Robi Datathon 2024 (First Runner-up)** *May 2024*
  Robi Axiata Ltd, Huawei [🔗]
  - Runner-up in this national data-science competition based on customer purchase behavior prediction in a data-scarce setting.
  - Received a $3000 scholarship.

LEADERSHIP EXPERIENCE

- **Lead Organizer & Instructor of DLSprint 2.0 2023** *August 2023*
  BJIT Group, CSE BUET [🔗]
  - Served as an organizer of this open-for-all Computer Vision Competition on Automatic Document Layout Analysis for Bengali.
  - Conducted two workshops as an instructor on common competition practices, computer vision, and image segmentation.
  - Took ownership, being involved in the competition's conception to execution.

PROJECTS

- **Ticketing** – A microservices web app that lets users buy and sell tickets
    - Backend: NodeJS, Typescript, MongoDB, NATS Streaming. Consists of 6 independent services, coordinated by an eventbased architecture.
    - Frontend: NextJS, TailwindCSS
    - Orchestration: Kubernetes
- **Sub-C-Compiler** – A compiler for a subset of the C programming language
    - Tools: Flex (Lexer), GNU Bison (Paser)
    - Languages: C, C++
- **Mobile-Doc** – A telemedicine web app
    - Backend: FastAPI, MongoDB, Redis, BigQuery
    - Frontend: React, MUI
    - Deployment: Netlify
    - Deployment: Pokedoc
- **Suntech** – An e-commerce web app
    - Backend: Flask, OracleDB
    - Frontend: Jinja2, HTML, CSS, VanillaJS
- **Ray-Tracing** – A rendering pipeline implementing ray tracing in OpenGL scenes
    - Language: C++
    - Algorithms: Phong Lighting Model, Recursive Reflection
- **Enhanced xv6 OS** – Copy-On-Write and Memory Page-Replacement in the xv6 OS
    - Language: C
    - System Calls, Process Schedulers, Page Replacement
- **twitt3r** – A Twitter clone using the t3 stack
    - Framework: NextJS
    - Stack: T3 (Typescript, trpc, TailwindCSS)
    - Persistence: PlanetScale, Prisma ORM
    - Deployment: Vercel
    - Deployment: twitt3r
- **DocumentQA** – A langchain LLM document chatbot
    - Language: Python
    - Libraries: langchain, OpenAI
    - UI: Chainlit
    - Database: ChromaDB Vector Database
- **IllusionVQA** – A Challenging Optical Illusion Dataset for Vision Language Models
    - This work is a part of my undergraduate thesis
    - Published at **COLM'24**
    - Paper: IllusionVQA: A Challenging Optical Illusion Dataset for Vision Language Models
    - Website: IllusionVQA
